

BIOPHOTON THERAPY

FUNCTION AND EQUIPMENT

What are biophotons?

Biophoton therapy is a modern and rapidly growing therapy based on soft (cold) laser light. Its effectiveness is based on the fact that the billions of cells in your body communicate using tiny light signals. Inside the body, we call these signals 'biophotons'.

Everything in the body works closely together and depends on one another. Good and fast communication between cells is therefore essential. For a long time, science assumed that the only way cells could communicate was through hormones and nerves. But in the early 1980s, it was demonstrated that the primary way cells communicate is by sending and receiving weak light signals.

A human body consists of 33 trillion cells. Every cell contains a DNA core that sends out between ten thousand and one hundred thousand light signals (biophotons) per second to surrounding cells. The ancient idea that humans are 'beings of light' is therefore absolutely correct. All our cells are in constant communication with each other through these light signals. Biophotons are truly indispensable.

How does the body get biophotons?

The body cannot produce biophotons on its own. Just like certain essential vitamins such as Vitamin C and B12, the biophotons used in the body must be absorbed from outside. Once absorbed, biophotons are reused by the body as much as possible. However, because the body also leaks or loses biophotons through the skin, regular replenishment is necessary. The natural way to absorb biophotons is through sunlight on the skin (about 70%) and through food (about 30%). Raw, living, unprocessed food contains a lot of biophotons. Plants absorb biophotons. We eat the plants (or the animals that eat the plants) and in this way, we take in biophotons.

If you heat food before consuming it, it loses an average of 90% of the biophotons present. Highly processed (refined) food has even lost 99 to 100% of its biophotons. Because we hardly eat anything raw anymore and almost everything is processed, the body can barely absorb biophotons from food. Since the body cannot function optimally without a regular supply of new (bio)photons, we have to get them ourselves from sunlight.

Animals are exposed to direct sunlight for at least 10 hours a day, without clothing. Humans, by nature, as well. But over the centuries, we began living indoors more and wearing more clothing — and as a result, we have become increasingly sick. Our Northern climate and lifestyle prevent us from getting enough exposure to sunlight and absorbing biophotons. Most people spend more time indoors than outdoors, and even when they are outside, they are wearing clothes. Understandable in a country where it is cold for half the year and in a culture where people would look at you strangely if you walked around outside in just your underwear, even in the summer.

The fact is, we spend 95% of the year indoors behind glass. We will now explain why this prevents proper absorption of biophotons. Even though sunlight appears to be white light, it is actually made up of dozens of different colours. Your body mainly absorbs biophotons from the infrared spectrum. This light is invisible to the human eye but is the most important source of biophotons for your cells. The glass used in our homes and offices only lets through 50% of this infrared light.

The image shown above illustrates the colours present in free sunlight versus the colours of the same sunlight measured through a glass window. You can see that glass windows, although they let through 90% of visible light, only allow 50% of infrared light to pass through. So, light coming through glass windows already contains 50% less infrared light compared to outside. And it is precisely this light that we need to absorb biophotons from. People cannot see infrared light with their eyes, so the reduction is not noticeable. We then come to the second problem.

In an average living or working space with windows, the total sunlight strength is on average 80% lower than outside. So, if you are in a room with many windows, we already start with an average of 80% less sunlight intensity than outside. The light we do get contains 50% less of the all-important infrared light. Next, we prevent 70% of our skin from absorbing biophotons from this light by constantly covering it with clothing. The percentage of infrared sunlight that reaches our bare skin indoors — to absorb biophotons from — ultimately amounts to only 3% of the natural level. This causes biophoton deficiencies in the body!

Hard to believe?

Then consider that the scenario we just described is generally still the most favourable situation we encounter. Because most people are in spaces where most of the light comes from artificial lighting. Nowadays, this is almost always LED lighting. LED lamps are energy-efficient, great for your wallet but not for your health. They are energy-efficient because they only produce light that is visible to humans. It is a mix mainly of red with some green and blue. Unlike sunlight, they contain NO infrared light. So, from this light, you can no longer absorb any biophotons at all.

NATURAL SUNLIGHT

WARM WHITE LED LAMP

Unless you spend hours outside every day with a partially exposed body, you have a biophoton deficiency. Period. And biophoton deficiencies lead to a lack of communication ability between the cells. When the communication between cells deteriorates due to a shortage of biophotons, your organs and self-healing abilities do not function properly, leading to all kinds of complaints and diseases.

Toxins start to accumulate, and the number of latent inflammatory processes with unwanted viruses, fungi, and bacteria in your body will increase. This chain reaction plays a major role in practically all chronic complaints and illnesses.

You could describe (bio)photons as **vitamin P**, vitamin Photon. Unfortunately, biophotons are not substances that can be packed into vitamin pills. However, they can be irradiated into the body with special light sources. It turns out that infrared lasers, at a specific light intensity — not too weak and not too strong — emit exactly the type of light that cells can absorb well. A thousand times more efficiently than full sunlight and a hundred times more efficiently than the best red light lamps without lasers.

This is the reason why biophoton therapy uses soft infrared lasers. Now that thousands of international studies support the effectiveness of soft laser light, biophoton therapy is being applied more and more. It is the mission of PHOTON 4 HEALTH to accelerate this process with affordable, medically certified treatment equipment for both professionals and home use. Biophoton therapy addresses the biophoton deficiency, enabling cells to communicate better with each other and allowing the entire body with all its organs to function better. It is the most powerful therapy in the world to activate the body's self-healing ability and is therefore effective against hundreds of conditions.

Biophoton therapy for home use or your practice/salon

As you can see later in this brochure, we offer 5 different models of biophoton therapy lamps for rent and sale. The operation and use are simple and require no medical background. Press start and the lamp does the rest. While you relax lying or sitting under/in front of the lamp, special medical infrared lasers painlessly and safely shine biophotons into the body, which the body will distribute to all its cells and organs.

The produced light is of low intensity and generates hardly any heat. Biophoton therapy combines very well with practically all other therapies, such as bioresonance therapy, foot reflexology, acupuncture, massage, etc. Providing the body with more (bio)photons improves overall health, both physically and emotionally, and gives the self-healing ability a boost. Additionally, our lamps include red light therapy for even more health benefits.

The positive effects of biophoton therapy

- *Results after just 1 treatment*
- *The self-healing ability restores itself*
- *All organs start to function better*
- *You feel more energetic and vital, and sleep better*
- *Fewer complaints of chronic diseases*
- *Emotional disorders back under control*
- *Reduction in bowel/lung/skin/pain complaints*
- *Can be combined with any other therapy*
- *Excellent value for money*
- *Effectiveness supported by thousands of studies*
- *Easy to operate*

A blurred background image of a family walking on a beach. In the foreground, the back of a person's head and shoulders are visible. Behind them, a child and an adult are walking away from the camera towards the ocean. The scene is bright and sunny, with the beach sand and waves visible in the distance.

92.9% SUCCESSFUL WITH OVER 10,000 OF OUR CUSTOMERS, INCLUDING:

- ✓ FATIGUE AND VAGUE COMPLAINTS
- ✓ ARTHRITIS, OSTEOARTHRITIS, CHRONIC PAIN
- ✓ STOMACH AND INTESTINAL PROBLEMS, GOUT
- ✓ BURNOUT, STRESS, OVERWEIGHT
- ✓ DIABETES (TYPE 1 AND 2)
- ✓ DEPRESSION, ANXIETY, AND MOOD DISORDERS
- ✓ INFECTIOUS DISEASES SUCH AS LYME, PFEIFFER, CANDIDA
- ✓ IMPROVEMENT OF ALL ORGAN FUNCTIONS
- ✓ POST-COVID AND SIDE EFFECTS OF VACCINATIONS
- ✓ LUNG COMPLAINTS SUCH AS ASTHMA, BRONCHITIS, COPD
- ✓ ECZEMA, SLEEP PROBLEMS, MIGRAINES
- ✓ FOOD INTOLERANCES, ALLERGIES, HAY FEVER
- ✓ FERTILITY PROBLEMS, ENDOMETRIOSIS
- ✓ THYROID AND HORMONE SYSTEM ISSUES
- ✓ IMPROVEMENT OF THE IMMUNE SYSTEM AND PERFORMANCE
- ✓ FIBROMYALGIA, PMS, ME, CFS, AND MUCH MORE

The portable PHOTON 4 HEALTH | REDPOWER MINI ATP is a portable biophoton therapy device. The focus of this device is on quickly and easily increasing biophotons and ATP (energy). You wear it on your body with a strap. (Tripod available separately.)

PHOTON 4 HEALTH	REDPOWER MINI ATP
Treatment advice	15 to 30 minutes daily
Lasers (140mW)	Biophotons: 22 lasers 785nm @ 5mW ATP: 2 lasers 635nm @ 5mW 2 lasers 520nm @ 5mW 2 lasers 405nm @ 5mW
LEDs (0,4 Watt)	4 red LEDs 630nm @ 50mW 4 infrared LEDs 810nm @ 50mW
Magnetic field	None
Battery capacity	3,100 mAh, good for 7 x 30 min
Dimensions	8x8x2 cm and only 0.2kg
Price	€1,700 incl. 21% VAT
Rent?	Only €95 per month
Warranty	3 years + 30 days money-back guarantee
Lifespan	10.000 hours (50 years)

The super complete PHOTON 4 HEALTH | REDPOWER @HOME is a biophoton therapy device for home use. Equipped with all the techniques found in the PRO devices for practices. 37 lasers, red/infrared light therapy, and a TESLADISC with laser-ATP-energy therapy + magnetic field therapy. Supplied with a table clamp and roll stand.

PHOTON 4 HEALTH	REDPOWER @HOME
Treatment advice	40 minutes per session, 3 times per week
Lasers (226mW)	Biophotons: 29x infrared 785nm @ 6mW, ATP: 2x green 520nm @ 8mw, 4x red 635nm @ 6mW, 2x purple 405nm @6mw.
LEDs (15 Watt)	40 power LEDs. Red: 10x630nm, 10x670nm. Infrared: 10x810nm, 10x850nm.
Magnetic field	Tesla PEMF scalar with Schumann resonance
Price	€2,700 incl. 21% VAT
Lifespan	20.000 hours (100 years)
Rent?	Only €170 per month
Warranty	3 years + 30 days money-back guarantee

The super complete PHOTON 4 HEALTH | REDPOWER PRO is a professional biophoton therapy device with the best price/quality ratio in the world. It is equipped with 120 lasers, 30 of which are for laser-ATP-energy therapy. It also has 700 red/infrared mini LEDs and Tesla magnetic field therapy.

PHOTON 4 HEALTH	REDPOWER PRO
Treatment advice	40 minutes per session
Lasers (780mW)	120 lasers. 90 lasers 785nm @6mW, 10 lasers green 520nm @ 8mw, 10 lasers red 635nm @ 8mW and 10 lasers purple 405nm @8mw.
LEDs (180 Watt)	700 mini 4-in-1 LEDs. Red: 630nm&670nm, Infrared: 810nm&850nm.
Magnetic field	Built-in Tesla coil. Schumann resonance
Price	€6.700 incl. 21% VAT Free trial placement available for practices/salons
Rent?	Just €245 per month
Annual turnover	€109,200 (based on 30 treatments per week at €70)
Warranty	3 years + 30 days money-back guarantee
Lifespan	30,000 hours (15 years)

The PHOTON 4 HEALTH | REDPOWER PRO XL is in the absolute top segment. This luxury full-body bio-photon therapy device has an electric stand, built-in magnetic field therapy, voice control, laser ATP energy therapy, and (infra)red light therapy. With its 176 lasers, it is the most powerful bio-photon lamp in the world.

PHOTON 4 HEALTH	REDPOWER PRO XL
Treatment advice	30 minutes per session
Lasers (1.056mW)	Total of 176 lasers. 132x785nm 5mW, 14x520nm 10mw, 14x650nm 7mw, 16x450nm 7mw
LEDs (700 Watt)	344 power LEDs. Red 630/660nm. Infrared 785nm/810/850/940nm
Magnetic field	Built-in Tesla coil. Schumann resonance
Light unit dimensions	160x30 cm full body
Price	€9,700 incl. 21% btw Free trial placement available for practices/salons
Rent?	Just €395 per month
Annual turnover	€124,800 (based on 30 treatments per week at €80)
Warranty	3 years + 30 days money-back guarantee
Lifespan	30,000 hours (20 years)

The PHOTON 4 HEALTH | BRAINHEALER is the first laser bio-photon therapy device in the world, developed for the treatment of brain diseases such as dementia/Alzheimer's, Parkinson's, MS, ALS, depression, and brain injuries. This revolutionary device will advance brain functions and memory performance significantly with 90 lasers, 60 LEDs, and a patented all-in-one treatment programme.

PHOTON 4 HEALTH	BRAINHEALER
Treatment advice	20 minutes daily
Lasers	Total 90 lasers. 78x infrared 785nm @5mW, 4x green 520nm @5mw, 4x red 650nm @5mw, 4x purple 405nm @5mw
LEDs	60 units. 15x630nm, 15x670nm, 30x810nm
Magnetic field	Built-in scalar magnetic field
Price	€2,950 incl. 21% VAT Free trial placement available for practices/salons
Rent?	Just €199 per month
Warranty	3 years + 30 days money-back guarantee

The PHOTON 4 HEALTH | BODYSLIMMER PRO differs slightly from our standard products. This laser therapy is not focused on bio-photons but on reducing fat in the body. The medical green lasers liquefy the fat in fat cells, allowing it to seep out and be converted into energy. It is also the first of its kind to feature added infrared bio-photon lasers, ATP energy therapy, and 295.8Hz slimming magnetic field therapy.

PHOTON 4 HEALTH	BODYSLIMMER PRO
Treatment advice	30 minutes per session, once a week
Lasers	Total 37 lasers. 10x extra-powerful rotating green slimming lasers 532nm @17mW. 17x infrared 785nm biophoton lasers @6mW, 6x red 635nm @6mW, 2x purple 405nm @6mW, 2x green 520nm @ 6mW
Magnetic field	Tesla slimming magnetic field therapy 295.8Hz
Price	€17,000 incl. 21% VAT* *temporary introductory price Free trial placement available for practices/salons
Rent?	Just €595 per month
Annual turnover	€195,000 (based on 30 treatments per week at €125 each)
Warranty	3 years + 30 days money-back guarantee
